

Project Iteration 2
Activity 1
User-Centric Computing II
COMP4600
Spring 2025
Summary document

Project Name: Lumina

Team Name: DesignSphere

Team Trello board URL: <https://trello.com/b/CjqsFb8M/lumina>

Team Github repo URL: <https://github.com/ma2088/DesignSphere>

Final Website URL: <https://luminadesignsphere.web.app/>

Member information

#	Name
1	Marius Adrian
2	Jupiter Lebrun
3	Isaiah Williams

P2A1 Work summary

Team discussion summary

You must list the following things here -

- What the users liked about the skeletal sites*

Clean navbar, icons and well-styled buttons. Easy to navigate and a clean layout.

- the design issues you found from all the usability test data analysis. You must include what problems/discomfort/suggestions users reported/made, and what issues each member observed during usability test.*

We had issues with the footer, and we change the original color. We deleted the sign in and register button from the nav bar and added the success page that was missing.

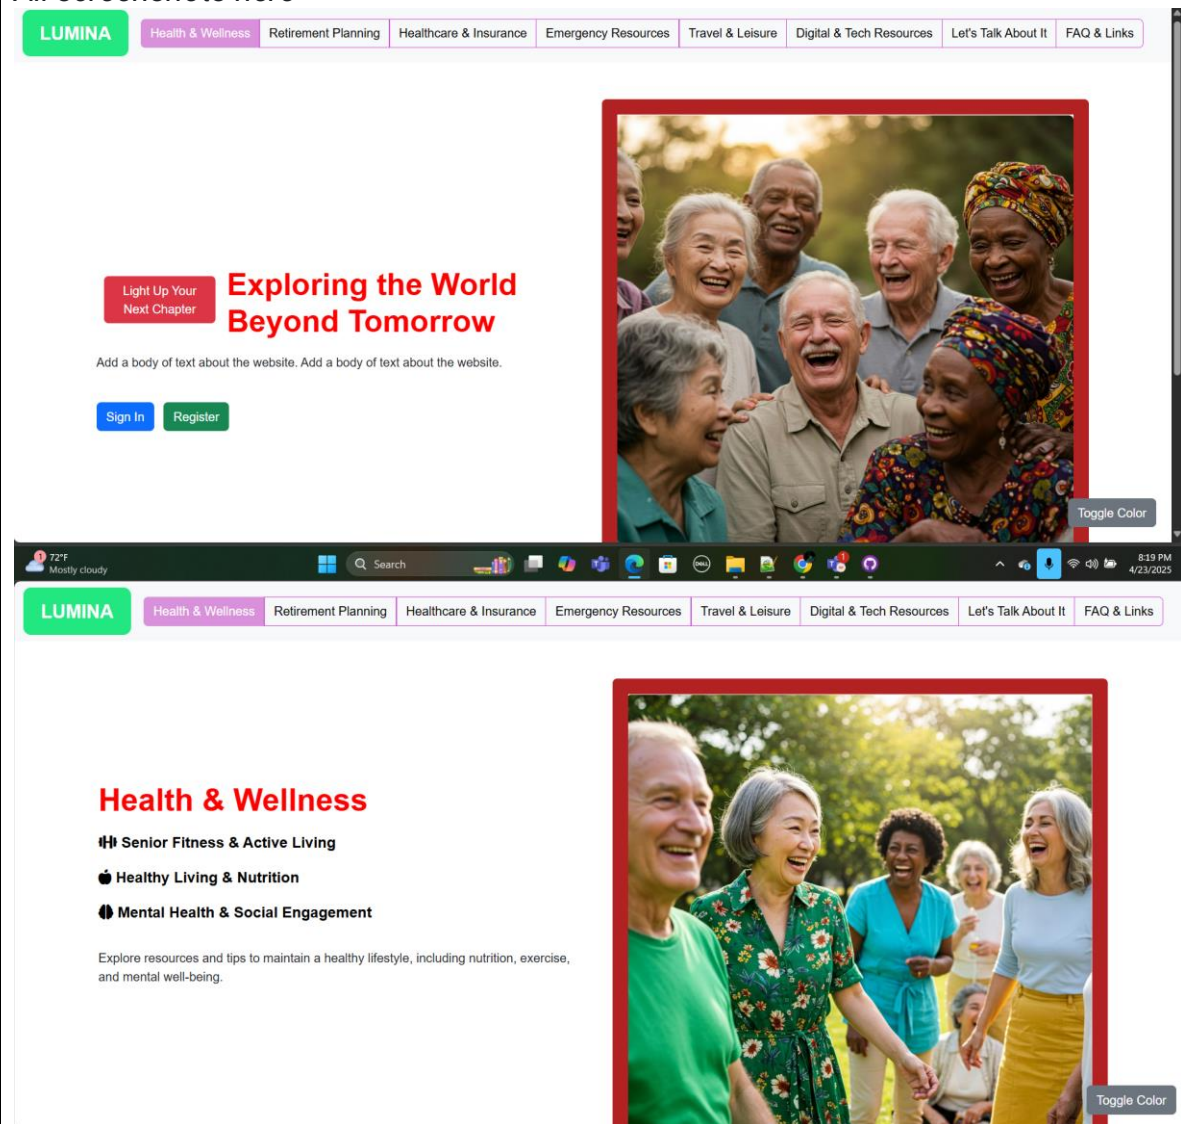

- how the team decided to address the design issues and incorporate the solutions to the final website.*

We were changing the format in the html and CSS file. We meet on teams over video meetings and made a code review.

Jupiter Lebrun	Home with subpages Health & Wellness with subpages Let's Talk About it with subpages Hosting to Firebase
Marius Adrian	Retirement Planning with subpages Healthcare & Insurance with subpages Emergency Resources with subpages
Isaiah Williams	Travel & Leisure with subpages FAQ & Links with subpages Digital & Tech Resources with subpages
